

Joint Solution Brief

Enabling the Oracle-adjacent and multicloud journey

Transform your enterprise by enabling hybrid, cloud adjacency and multicloud solutions.

Together, Accenture and Equinix help enterprises accelerate their adoption of Oracle public and hybrid cloud options, including cloud adjacent deployment and multicloud. Our combined expertise defines the strategy and architecture, executes the migration for mission-critical applications and databases, and mitigates the change risks.

We support hybrid, adjacent and multicloud deployments that deliver high levels of on-premise performance and control, improved application and database connectivity, plus multicloud integration. With our industry-leading, low latency and high throughput connections, you can also configure and connect virtual network services at the edge in minutes—without the need for additional space, power, hardware or equipment.

The major challenge you face

Enabling digital transformation while cutting IT costs

Enterprises need to maintain and strengthen competitive advantages by achieving a successful digital transformation, while reducing the expense of IT ownership. Lack of expertise and limited budgets often result in slippage, opening the door for competitors to gain advantage. How can you quickly modernize your operations in the cloud, while preserving your existing investments? How can you successfully migrate your business-critical workloads to Oracle Cloud to lower ongoing operations costs, and achieve improved performance?

By moving Oracle workloads into Oracle Cloud, you avoid additional expenditure and complexity, and gain predictability across network, database and application performance.

The key benefits of our joint solution

Lower TCO and higher performance

We help you to quickly identify the potential savings opportunities in a move to Oracle Cloud. Our lower-cost solution encompasses all requirements for business continuity and security.

Successful cloud migration

To successfully evolve your infrastructure, we define the all-encompassing plan and execute your migration to Oracle Cloud—maximizing the business value and innovating the ecosystem.

Risk mitigation

Using Accenture's Oracle Health Check, we perform a diagnostic service against your Oracle environment before implementing the migration, ensuring the results are optimized.

Performance optimization

Our hybrid cloud architectures and multicloud options place your solutions closer to cloud providers, SaaS providers and ecosystem partners—ensuring low latency interconnection for users.

We enable enterprises achieve successful public and hybrid cloud transformation

Our leading capabilities that enable success

Oracle Cloud Infrastructure (OCI)

The first of its kind built specifically for enterprise, Oracle's second generation cloud infrastructure platform delivers unmatched reliability, scalability and performance for mission-critical databases, applications and workloads. OCI enables the world's first self-managing, self-repairing and self-securing autonomous database.

Exadata and Oracle Exadata Cloud@Customer on Platform Equinix®

Our optimized database platform for on-premises or cloud is available as traditional Exadata (hardware and software), or as Oracle Exadata Cloud@Customer for fully managed Oracle Cloud services in your data center or Equinix adjacent co-lo. This option gives you the benefits of Oracle Cloud, while meeting data residency and system proximity requirements.

OCI FastConnect

FastConnect allows customers to connect directly to their OCI virtual cloud network via dedicated, private, high-bandwidth connections. Then, based on the amount of data, customers simply choose an appropriate port speed and pay a consistent, low price each month. Other providers charge for the amount of data moved, which can be expensive and unpredictable.

Adjacent or multicloud adoption

Whatever the workload, however unique the environment, Accenture enables an efficient adoption of adjacent or multicloud. From defining the strategy and architecture, to streamlining the migration and supporting optimized operations, we increase availability, lower costs, minimize risk and deliver Oracle adoption for innovation.

“Edge location deployment is required to address the challenges around network latency and data efficiency for real-time insights. This new requirement to store data at the edge will lead to the evolution of a new model of multi-locational hybrid data architectures.”

IDC Infobrief, sponsored by Equinix and Oracle, Unlocking Data with Cloud Adjacency, 2020

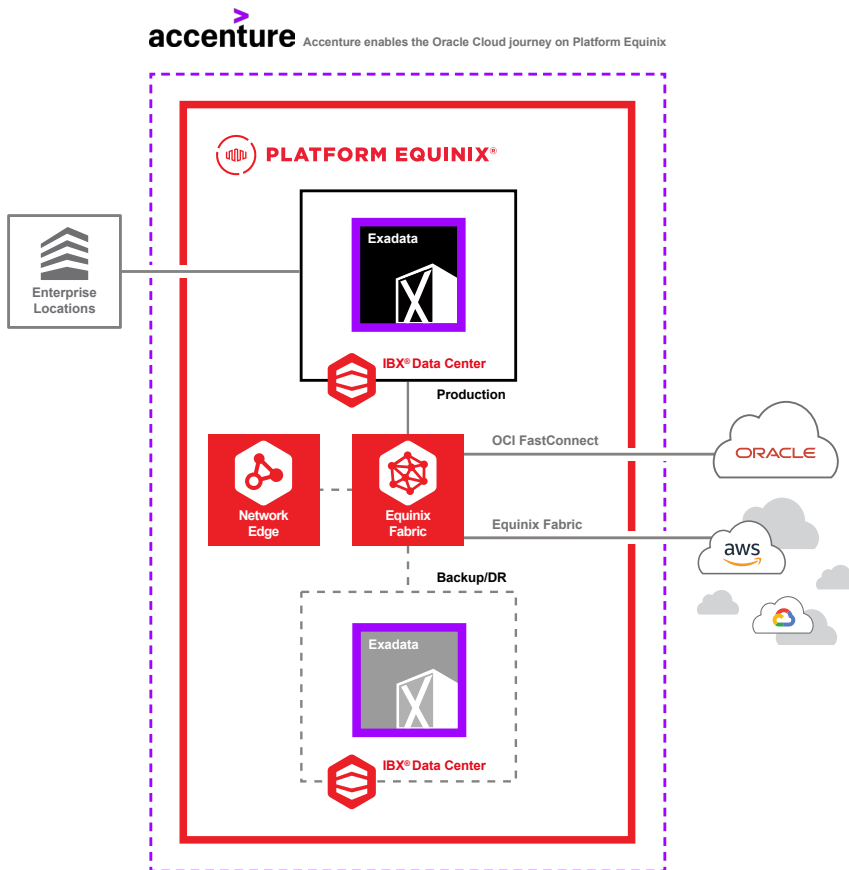

Our leading capabilities that enable success

Equinix Fabric™ and Network Edge Services

Equinix Fabric directly, securely and dynamically connects distributed infrastructure and digital ecosystems on Platform Equinix® via global, software-defined interconnection. With Equinix Network Edge Services, you can select, configure and connect virtual network services at the edge without extra space, power or equipment.

Platform Equinix®

The leading global digital enablement platform for interconnecting business, Platform Equinix allows you to reach everywhere, interconnect everyone and integrate everything. Deployed in the world's most strategic and highest-quality data centers, it places your solutions within the richest digital ecosystems.

About Accenture

Powered by the world's largest network of advanced technology and intelligent operations centers, Accenture's digital, cloud and security services encompass strategy and consulting, interactive, technology and operations across 40+ industries.

About Oracle

The Oracle Cloud offers a complete suite of integrated applications for Sales, Service, Marketing, Human Resources, Finance, Supply Chain and Manufacturing. It includes our generation 2 infrastructure featuring the Oracle Autonomous database.

About Equinix

Equinix is the world's digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. We enable our customers to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.

Ready to get started?

For more information on partnering with Accenture, Oracle and Equinix to enable your Oracle adjacent or multicloud deployment, contact us at rasmus.castren@eu.equinix.com for Finland or christoffer.idstroem@eu.equinix.com for Sweden.
